

# CQG

CQG is the industry’s highest-performing solution for integrated trade routing, global market data, and advanced technical analysis. CQG’s server-side order management tools for spreading, market aggregation, and smart iceberg orders are unsurpassed for speed and ease-of-use. CQG’s market data feed consolidates over a hundred sources, including exchanges worldwide for futures, options, fixed income, foreign exchange, and equities as well as data on debt securities, industry reports, and financial indices. CQG offers the following options:

- **CQG Integrated Client** has earned a solid reputation through decades of reliable performance, providing customers with an innovative electronic trading interface complete with accurate global market data, professional analytical tools, and advanced order routing all in one application. CQG Integrated Client provides the ideal solution for all trader needs.
- **CQG Spreader** allows traders to easily create and manage multi-legged intramarket, intermarket, and cross-exchange spreads and to effectively manage incomplete orders. The close proximity of CQG’s collocated spread servers to the exchange matching engines allows modification and execution of second legs to occur in less than a millisecond.
- **CQG Trader** offers the speed and reliability of the CQG Integrated Client in a streamlined quote and trading platform. CQG Trader is a popular platform for traders looking for a cost effective, transaction-based order routing solution.
- **CQG APIs** make it possible for customers to seamlessly deliver CQG’s market data and analytics to external applications and to route orders through CQG’s Hosted Exchange Gateways.
