

TRADING TECHNOLOGIES

A high percentage of the electronic volume traded on the five largest derivatives exchanges moves through Trading Technologies X_TRADER®. Advantage Futures has made a multimillion dollar investment in technology infrastructure that supports this application. We have the largest, most robust TT architecture of any firm in the industry—more servers for client trading.

X_TRADER with the patented MD Trader® interface allows traders access to numerous products and multiple markets on a single customizable screen. It also incorporates the X_STUDY® charting and analytics application at no additional cost.

For a detailed listing of the prices associated with X_TRADER, please see the schedule below. Contact an Advantage sales representative with any questions at 312.347.4800
