OPTIONSCITY

OptionsCity provides a powerful, scalable, server based, end-to-end trading system. It utilizes the latest developments in technology to present a solution that is user-friendly and flexible, yet powerful to encourage dynamic quoting. OptionsCity clients are market makers and high volume proprietary traders.

OptionsCity Metro is an intuitive software front-end. Features include an electronic eye, open API, multiple models for options pricing, auto hedging, auto execution, mass quoting and risk management all in one platform. This front-end allows traders to connect and trade on multiple exchanges.

OptionsCity Metro enables traders on and off the floor to work in a collaborative way, communicating throughout the day to realize the highest trading potential. OptionsCity is a server based application which requires the purchase of a server.
